

The Specialist in
Drain Cleaning Equipment
for over 75 Years

Double-wound

Drain Cleaning Cables No. 915

Coiled from patented, hot galvanized spring wire - with 1/2" Ww. thread couplings

CABERE double-wound Drain Cleaning Cables
for Professional Use

For Pipes
50 - 500 mm Dia.

Successfully used for decades.

CABERE double-wound, flexible Drain Cleaning Cables are coiled from top quality, patented, hot galvanized spring steel wire. Double-wound outer wire with opposite-wound inner-core for maximum strength and right amount of flexibility. This cable lasts longer because it resists kinking and breaking.

Our special construction makes the CABERE cable so extraordinary flexible, tough and rust resistant.

CABERE Drain Cleaning Cables No. 915 come complete and ready for use with crank handle, hand protector and 3-pronged claw.

The reliable galvanized steel couplings with 1/2" Ww. thread make it easily possible to extend the cable with extension cables or to equip the cable with various cleaning heads.

CABERE Drain Cleaning Cables No. 915 are for pipes of 50 - 500 mm. Our cables are ideal for cleaning stoppages from drain pipes in buildings, hotels, restaurants, swimming baths, fun parks, old people's homes, hospitals, schools, barracks, plants, refineries, power stations, camps, ships etc.

Only the original CABERE Drain Cleaning Cables are authorized to bear the quality label "Deutsches Werkzeug - made in Germany" of the Association of German Tool Manufacturers FWI, as well as the GS label "Tested Safety" and the Environmental Label "Blue Angel".

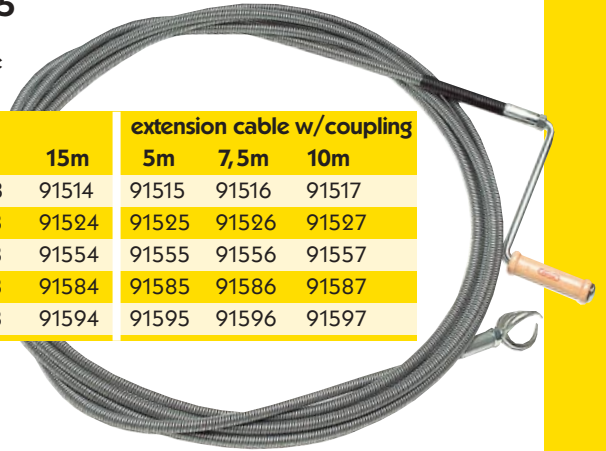

CABERE No. 915 Extension Cables:
with 1/2" Ww. thread
galvanized steel couplings

CABERE double-wound Drain Cleaning Cables No. 915

The cables are equipped with our reliable galvanized steel couplings with 1/2" Ww. thread. The cables come complete and ready for use with exchangeable crank handle, hand protector and exchangeable 3-pronged claw.
